^b Wildlife Ecology and Conservation Group, Wageningen University, Wageningen, the Netherlands

^c Smithsonian Tropical Research Institute, Balboa, Panama

^d School of Life Sciences, University of KwaZulu-Natal, Durban, South Africa

Elsevier sincerely regrets that an error was introduced in Fig. 3f during the processing of this article. The black (double) solid arrow with an 8 above it should be grey, not black. The figure legend in the article is correct: ‘Arrows show the average time during the treatment period when the sound treatments were significantly different from the control (black) and the wolf playback (grey; Tukey’s multiple comparison test: $P < 0.05$).’ The sheep treatment is significantly different from the wolf treatment in the first 8 days in broadleaved forest.
